

Date of Review/Recommendation: February 17, 2009

Water Body Under Evaluation:

Water Body ID #: 2752  
Name: Neals Creek (Class C)  
Length of Segment: 3.2 miles  
County(ies): Iron

Use Attainability Analysis (UAA) Study:

UAA ID #: 0789  
Submitter: MEC Water Resources  
Date(s) Conducted: October 25, 2007  
Date Received: December 1, 2007  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.  
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.  
☐ 3-Non-Remedial, Human Caused Condition.  
☐ 4-Hydrologic Modifications.  
☐ 5-Natural Physical Features.  
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in October 2007 and no WBCR was observed. No interviews were conducted during the survey and no comments were received. The UAA documents evidence of WBCR at site 3 (a rope swing) and secondary contact (a campsite) adjacent to the stream (photographs included).

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 2 out of 3 sites evaluated. Due to the stream meeting the maximum depth criterion and the evidence of an existing use, the committee recommends the WBCR use designation be retained. Due to documented secondary contact use, the committee recommends Secondary Contact Recreation be assigned.

**Committee Recommendation:**

☐ Add Use ☒ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
